WindSpring Names Tom Hunt President and CEO

*Executive brings expertise in emerging growth markets and
mobile computing to software innovator*

SAN JOSE, Calif., April 26, 2007 WindSpring, Inc., an advanced compression technology and software provider, today announced the appointment of Tom Hunt as president and CEO. Hunt replaces Robert F. Mitro, former Chairman and CEO, who is retiring.

“We are very pleased to be able to bring the talents and experience of a 20-plus-year industry veteran like Tom Hunt to WindSpring,” said Mitro. “Tom’s strategic vision, depth of experience and legacy of successful leadership in the mobile and wireless industry will be invaluable in propelling WindSpring to the next stage in our success.”

Tom’s industry experience includes six years at Intellisync Corporation, where he served as vice president of Enterprise Sales, vice president of Marketing and vice president of Corporate Development. In those roles, he oversaw a broad range of major initiatives, including M & A activity (resulting in four significant acquisitions), technology licensing, and a transition of the company to an enterprise sales model resulting in revenue from 80 percent of the Fortune 500.

Hunt has also held key executive and general management roles in sales, marketing, business development and corporate strategy at FusionOne, EasyReach, JP Mobile, RadioMail, and GRiD Systems. Hunt began his career by serving in White House Presidential Communications for the Reagan Administration.

About WindSpring, Inc.

WindSpring is a provider of advanced compression software for the digital mapping and navigation markets. The company’s patented data miniaturization technology (DMT™) eliminates the need for file decompression, drastically reduces the data footprint of large files, and allows total data manipulation while in the reduced state. The company is focused on in-dash navigation, personal navigation devices, trucking/logistics,

Internet/consumer wireless and enterprise/public sector GIS. More information about the privately-held, San Jose, California-based company is available at www.windspring.com.
